

Success Story

Everyman Theatre's IT Infrastructure Solution

400
seats

28m
redevelopment

20
services

100%
complete solution

GOAL:

Everyman Theatre's 400-seat venue in Liverpool underwent a complete refurbishment, requiring a complete IT infrastructure which worked seamlessly from start to finish.

ESSENTIALS:

Millgate were required to supply and install an infrastructure including desktop and server migration, security applications, and ongoing support from our team.

REQUIREMENTS:

As the business grows, the best solution required 20 services to integrate seamlessly.

CHALLENGE:

With the redevelopment, the client needed the ability to expand in the future, needing flexible scalability and an up-to-date solution which would suit all needs.

SOLUTION:

Millgate reviewed and assessed the entirety of Everyman's current systems and requirements. The installation of a secure storage area network (SAN) and hyper-V virtualised infrastructure offered a strong backbone.

THE RESULTS:

We relieved their ideal solution, which would meet their future ICT/telephony requirements. The outcome reduced their IT cost, while increasing their flexibility and efficiency as a Theatre.

About Millgate

Millgate help clients succeed by delivering tech products, services and solutions that actually work.
