products sold
daily

100%
complete solution

GOAL:

Millgate's in-depth research would need to provide Blend & Bottle with an IT infrastructure which increased infrastructure resilience and allowed scalability for their vastly growing business.

ESSENTIALS:

A robust environment is conducive to decreased downtime risk, so the outcome needed to provide an end-to-end solution which worked seamlessly.

REQUIREMENTS:

Blend & Bottle needed the ability to deploy new IT services in an agile way, with the opportunity to scale up as their business continued growing.

CHALLENGE:

Blend & Bottle's staff increased by over 200 people in 18 months, meaning their IT infrastructure wasn't suitable for growth and risked downtime and efficiency.

SOLUTION:

Millgate scoped, designed and installed a bespoke solution suitable for Blend & Bottle, all within the required SLA time. Working with their IT manager and operations director, we understood the needs of the business fluently.

THE RESULTS:

Millgate's HPE and VMware solution increased infrastructure resilience across their IT environment. Downtime risk reduces, scalability was now an option, and their IT manager's job was made much easier to maintain.

About Millgate

Millgate help clients succeed by delivering tech products, services and solutions that actually work.
